### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Crinion et al (US Patent 6,181,599).

With regard to claim 1, Crinion et al discloses a circuit 100 (terminal) that receives data frames at frame memory 120 (storing) as illustrated in FIG 1 (column 3, lines 5-6). It is inherent that a switch sent the received data frames as a switch is a relay device between two terminals. The received data frame includes four bytes of VLAN tag information (including VLAN IDs) (column 3, lines 50-56). Search circuit 130 (distinguishing) reads the frame information from the frame memory 120 and then searches for the frame information in the lookup table. Once it has located the frame information, search circuit 130 reads the corresponding tag data that includes a VLAN tag to be inserted (performing setting) into the frame (column 3, lines 9-14).

With regard to claim 2, Crinion et al discloses a search circuit 130 that associates frame information with corresponding tag data that includes a VLAN tag (plurality of VLAN IDs) (column 3, lines 9-14). Crinion et al further discloses detagging circuit 170

(test) that removes the inserted tag, if desired, before the frame is sent to the transmit ports (column 3, lines 40-43).

***Allowable Subject Matter***

3. Claim 3-10 are allowed.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew W Wahba whose telephone number is (571) 272-3081. The examiner can normally be reached on M-F 8:30-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kenneth N Vanderpuye can be reached on (571) 272-3078. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
